Andrea Della Robbia, which was the gem of the Bardini collection, brought \$11,500, going to a bidder represented by Otto Bernet. This was the top figure of the afternoon.

The bidding was not entirely consistent. In some instances the prices went much beyond the estimates of the experts, and in some cases much below. Upon the whole, gratification was expressed by those who conducted the sale that the auction did so well, considering the way times.

The Delia Robbia Madonna was a particularly beautiful relief, with the figure modeled in high relief in white against the usual Delia Robbia blue background. Prof. Allan Marquand. Princeton, who has given as much study to the work of the Delia Robbia as any one in America, has expressed himself as approving of the attribution of the work to Andrea Delia Robbia.
